Development pushes us to change and to be better every day, for this reason I seek personal and progressive growth using all my available skills to provide an optimal and effective work result.

EMPLOYMENT HISTORY

FullStack Developer
Axoft Argentina SA

11/2021 - Today

- I was requested by the I&D team to be part of the development and maintenance of the new framework used by the company. It required special training in .NET and Angular.
- Implementation of server-side paging in grids (EF + LINQ + Expression Trees).
- Implementation of client-side search in grids (Angular + DevExtreme).
- Changes in validations by licensing (Authentication core of the framework + interaction with COM+)
- General maintenance of the framework by correcting bugs of different topics and functionalities, thus achieving knowledge of the entire framework.

Semi Senior Developer
Axoft Argentina SA

03/2020 - 10/2021

- Worked with C# .NET to migrate desktop processes.
- Implementation of a new type of license validation. The task involved modifying the old Framework to make it compatible with the migration.
- Implementation of features with a higher level of complexity as established by the functional analyst.
- Development of new processes and modification of the database architecture.

Junior Developer
Axoft Argentina SA

04/2018 - 03/2020

- Worked with Delphi (Delphi XE4) to help fix common bugs.
- Collaborated with 5 other team members to implement new features based on customer requirements.
- Relational database management using SQL.
- Once I acquired enough experience, I began to carry out tasks of greater complexity until reaching the Framework level, such as session management, login validation, maintenance of the report generation framework.

EDUCATION

Bachelor's degree in Systems Analysis
Universidad de Buenos Aires

03/2019 - Today

Systems Engineering (mid-career)
Universidad de Los Andes, Venezuela

08/2014 - 12/2017

SKILLS

Problem-solving abilities

Communication   Collaboration

Critical Thinking   Enthusiasm

Work Ethic
